**Notes:**
- 48 V LI-ION battery pack
- 48 V LI-ION power cable
- 48 V LI-ION high voltage cable
1. Identification / recognition

- Location of the model name and type of driving power on the vehicle

- Power source: Lithium-ion batteries

THE LACK OF ENGINE NOISE DOES NOT MEAN THAT THE VEHICLE IS OFF. THERE IS THE POSSIBILITY OF SILENT MOVEMENT OR INSTANTANEOUS RESTART UNTIL THE VEHICLE IS COMPLETELY DISABLED.

2. Immobilization/ stabilization/ lifting

**IMMOBILISATION**

If the 12V system is still active:
1. Lock the wheels and operate on the control to engage the parking brake.
2. Set the selector lever to Park (P) position.

**STABILISATION / LIFTING POINT**

Do not place support elements such as wooden blocks or air lifting devices under the exhaust system, fuel feed system, and battery. An inconvenience can cause fire, electric shock or gas leakage.

3. Disable direct hazards / safety regulations

1. Execute the key OFF

For Smart Key:

- Press the START-ENGINE-STOP button with brake pedal NOT PRESSED

Remove the Smart Key.
4. Access to occupants

- **Windows / Sunroof**
  1. Laminated glass
  2. Tempered glass

- **Electric seats (optional)**

  Electric seats can operate only if the 12V battery in the engine compartment is connected.

- **Adjustable steering wheel**

5. Liquid / Solid / Gaseous energy storage devices

- 48V lithium-ion battery
- 12 V battery
- Fuel tank: 48L
6. In case of fire

Use water to extinguish fire from lithium-ion battery.
Apply and maintain a high volume of water for a period of time until there is no evidence of fire.

If it is not possible to apply water to the lithium-ion battery it is advisable to allow the battery to burn on its own.

7. In case of immersion

Work on the vehicle only after pulling it out of the water.

See Heading 3.

8. Towing / Transport / Storage

* Allowed only if the Electric Parking Brake is released.

PARK THE CAR AT A SAFE DISTANCE FROM THE OTHER VEHICLES

9. Important additional information
