Audi A3
Sportback, as of 2019

Note: The illustration shows the maximum possible range of equipment.
3. Disable direct hazards / safety regulations

Turn off the ignition

12-volt electrical system deactivation

Locate the 12-volt battery
Disconnect the negative terminal (-)

48-volt electrical system deactivation

Move the front passenger seat back and remove the battery cover
 Disconnect the connector on the front of the battery

In the event of an accident in which the airbags are deployed, the 48-volt electrical system will be automatically deactivated.

4. Access to the occupants

Glass types:
1 Composite safety glass
2 Single-layer safety glass

5. Stored energy / liquids / gases / solids

max. 55 l

12 V

48 V
Optional
6. In case of fire

Lithium ion batteries can self-ignite spontaneously or after a delay in the event of damage or incorrect use, and can re-ignite after a fire has been suppressed. Wear suitable safety equipment.
