1. Identification / recognition

The electric motor is noiseless. The display in the combi instrument (power meter) gives feedback as to whether the electric motor is switched off “OFF” or enabled for operation “READY”.

2. Immobilisation / stabilisation / lifting

Immobilising the vehicle

Actuate electrical parking brake.

Lifting points

Suitable lifting points
Battery pack, high-voltage

3. Disable direct hazards / safety regulations

Switch off the ignition (power meter display “OFF”)

Deactivate high voltage system

Option 1: from the motor compartment

1. 12V battery: Disconnect the negative pole from the body contact point.
2. Pull services switch.

In the event of accidents in which the airbag is deployed, the high-voltage system is automatically deactivated. The high-voltage system is voltage-free approx. 20 seconds after deactivation.

Disconnect from the charging station (emergency release)

Do not touch, cut or open high-voltage components and high-voltage batteries!
Wear appropriate protective equipment!

4. Access to the occupants

Glass type:
1. Laminated glass
2. Single-pane safety glass

5. Stored energy / liquids / gases / solids

If coolant escapes from the battery cooling system, there is a risk of a thermal reaction in the high-voltage battery. Monitor the temperature of the high-voltage battery!

Lithium-ion batteries can self-ignite or re-ignite after the fire has been extinguished. Wear appropriate protective equipment!

If coolant escapes from the battery cooling system, there is a risk of a thermal reaction in the high-voltage battery. Monitor the temperature of the high-voltage battery!

Lithium-ion batteries can self-ignite or re-ignite after the fire has been extinguished. Wear appropriate protective equipment!

After salvaging the vehicle from water, deactivate the high-voltage system (see Chapter 3) and allow the water to drain off. Wear appropriate protective equipment!

Do not tow the salvaged vehicle using the drive axle. Deactivate high-voltage system (see Chapter 3). Park the vehicle at a safe distance from buildings and other vehicles (min. 5 m). [Quarantine area].

Lithium-ion batteries can self-ignite or re-ignite after the fire has been extinguished. Wear appropriate protective equipment!

The vehicle does not have a towing eye at the rear of the vehicle.
