1. Confirmation/Identification

Even if the sound of the engine running is not heard, it does not mean that the vehicle is turned off. Before the vehicle is completely shut down, there is a capability of silent movement or instant restart, please wear appropriate personal protective equipment.

2. Secure/Stabilize/Lift

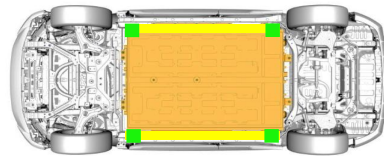

1. Make the vehicle immobile

Engage Park Gear

- ① Block the wheels and set the parking brake
- ② Engage Park Gear and apply parking brake

2. Stabilize lifting points

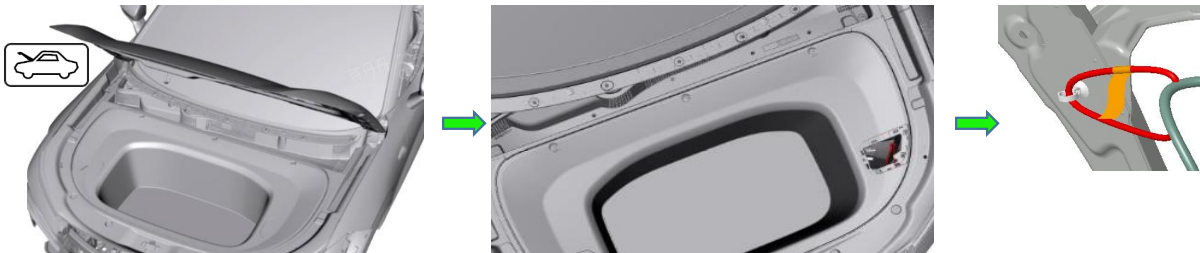

- Appropriate stabilization/lifting points
- Appropriate stabilization points on the vehicle
- High Voltage Battery

3. Eliminate Threats/Safety Hazards

1. Main method

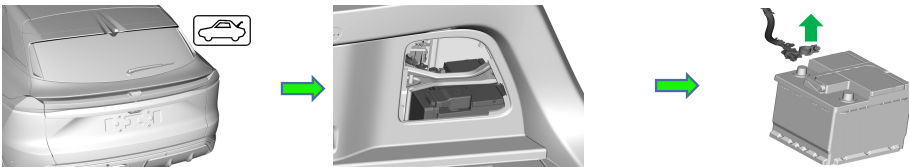

Cut the emergency cut-

Steps:

- ① Open the hood
- ② Remove the front headlight trim assembly (right)
- ③ Cut the emergency cut-off point, within the effective range of the harness

2. Disconnect the 12V power supply

Steps:

- ① Open the rear back c
- ② Remove the right side trim cover of the trunk.
- ③ Disconnect the negative cable harness.

Do not touch, cut, or open high-voltage components and batteries! Wear appropriate personal protective equipment.

Latch release internal

Emergency internal

5. Remaining battery/liquefied gas/fuel/solid fuel levels

		12V
		352V
		480g

6. Vehicle fire

Use large amounts of water to extinguish the fire (If it is difficult to provide a large amount of water, let the power battery burn out on its own)

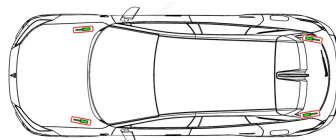

Risk of re-ignition of the power battery!

Additional information on warning gas strut actions in case of a fire

- Risk of missile effect from gas struts/preloaded springs on engine hoods and tailgates

7. Vehicle submersion

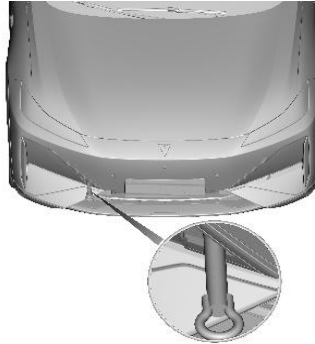

When dealing with any water-submerged vehicle, wear appropriate personal protective equipment. Before starting any operations, try to pull the vehicle out of the water as much as possible, secure the vehicle, and disable it (refer to Chapter 3).

Tilt the vehicle to one side to let the water drain from the vehicle and the high-voltage battery.

8. Towing/transfer/storage

 Risk of re-ignition of the power battery!  

9. Other important information

For details, please refer to the "Emergency Response Guide"

10. Use of the symbols explained

Warning high voltage

General warning sign

Air conditioning system components

Electric vehicle

Engine hood

Rear back door

Use thermal imaging camera

Flammable

Harmful to human health

Corrosive substances

Toxic substances

Compressed gas

Explosive

Use water for fire extinguishing
