1. Identification / Recognition

Lack of engine noise does not mean vehicle is off. Silent movement or instant restart capability exists until vehicle is fully shut down.

■ Location of vehicle badges

![Image showing vehicle badges](image)

■ Energy source: Lithium-ion battery

![Image showing Li-ion battery](image)

2. Immobilisation / Stabilisation / Lifting

■ Completely immobilize the vehicle

1. Chock the wheels and engage the parking brake.

2. Move the shift lever to the park (P) position.

■ Stabilisation-lifting point

Place cribbing such as wooden blocks at the four points under the front and rear pillars.

![Diagram showing stabilisation-lifting point](image)

Extra Reinforced Lifting Points  | Standard Jack Locations  | Vehicle Center of Gravity

Do not place cribbing such as wooden blocks or rescue air lifting bags under the exhaust system, fuel system or high voltage power cables. Doing so may result in fuel leaks, fire, or electric shock.

3. Disable direct hazards / Safety regulations

■ If any of the following systems are required to be operated, operate them BEFORE disconnecting the battery.

- Power door lock
- Electric parking brake
- Power window
- Back door opener

When the 12 V battery is disconnected, electrical components cannot be operated.
Perform procedure Main or Alternative to completely shut off the vehicle.

**<Procedure Main>**

1. Access to the occupants

2. Window Glass

3. Stored energy / Liquids / Gases / Solids

**<Procedure Alternative>**

1. Access to the occupants

2. Window Glass

3. Stored energy / Liquids / Gases / Solids
• Always wear appropriate personal protective equipment (PPE) when dealing with any of these items.
• Never breach or remove the battery assembly cover under any circumstances, including fire. Doing so may result in serious injury or death from severe burns or electric shock.

6. In case of fire

USE COPIOUS AMOUNTS OF WATER
If it is difficult to apply copious amounts of water to the high voltage battery, it is recommended to allow the high voltage battery to burn itself out.

7. In case of submersion

Do not touch any of the high-voltage components or cables, including the service plug, while the vehicle is submerged. Doing so may result in electric shock. Work on the vehicle only after the vehicle has been pulled out of the water.

8. Towing / Transportation / Storage

Store the vehicle at a safe distance (15 m (49.2 ft) or more) from other vehicles.

9. Important additional information
For further details, please refer to “Emergency Response Guide”.
